Contents to volume 136 (1991)

Number 1 – 24 January 1991

Research reports

Immunomagnetic isolation of NK and LAK cells
B. Naume, U. Nonstad, B. Steinkjer, S. Funderud, E. Smeland and T. Espevik (Norway) 1

A solid phase enzyme immunoassay for serum amyloid A (SAA) protein. Clinical evaluation
Y.S. Taktak and M. Lee (U.K.) 11

An enzyme-linked immunosorbent assay for the determination of bovine prolactin in plasma
C. Secchi, A. Berrini and V. Borromeo (Italy) 17

Preparation and characterization of polyclonal and monoclonal antibodies to polyamines
R.G. Schipper, J.A. Jonis, R.G.J. Rutten, G.I. Tesser and A.A.J. Verhofstad (The Netherlands) 23

Presence of matrix-specific antibodies in affinity-purified polyclonal antibodies
S.C. Sweet, M.E. Gnegy and M.J. Welsh (U.S.A.) 31

Development of an ELISA to assess the potency of horse therapeutic antivenom against Thai cobra venom
J. Rungsiwongse and K. Ratanabanangkoon (Thailand) 37

Quantitation of cellular tubulin in microtubules and tubulin pools by a competitive ELISA
D. Thrower, M.A. Jordan and L. Wilson (U.S.A.) 45

The production of antibodies to pentosanpolysulfate (ELMIRON, SP-54)
H.J. Callahan, D. Shupp-Byrne, M. Pizzo, C.L. Parsons and S.G. Mulholland (U.S.A.) 53

Heterologous enzyme immunoassay for the determination of free indole-3-acetic acid (IAA) using antibodies against ring-linked IAA
K. Manning (U.K.) 61

Indomethacin increases the sensitivity of the monocyte migration inhibition assay
R. Van der Gaag, L. Broersma, F.D. De Hon, M.A.C. Van Haren and R. Hoekzema (The Netherlands) 69

One- and two-step non-competitive avidin-biotin immunoassays for monomeric and heterodimeric antigen
P. Vilja (Finland) 77

Monoclonal antibodies against endometrial protein PP14 and their use for purification and radioimmunoassay of PP14
L. Riittinen, O. Närvänen, I. Virtanen and M. Seppälä (Finland) 85

Methodological considerations when using nitrocellulose immunoblotting from polyacrylamide gels to study the mould allergens *Aspergillus fumigatus* and *Alternaria alternata*
Å. Karlsson-Borgå and W. Rolfsen (Sweden) 91

FPLC purification of mouse monoclonal antibodies from ascitic fluid using blue DEAE and thiophilic sorbents
E. Juronen, J. Parik and P. Toomik (U.S.S.R.) 103

An alternative statistical treatment for summarizing the central tendency of replicate assay data
A.A. Stone, J.E. Schwartz, H. Valdimarsdottir, A. Napoli, J.M. Neale and D.S. Cox (U.S.A.) 111

An improved dot immunobinding assay for screening hybridoma supernatants. Non-purified antigen immobilized on nitrocellulose paper discs
M. Steinitz, A. Rosén and G. Klein (Sweden) 119

An improved method for the detection of DNA fragmentation
A. Facchinetti, L. Tessarollo, M. Mazzocchi, R. Kingston, D. Collavo and G. Biasi (Italy) 125

Short communications

The use of recombinant antigens in ELISA procedures for the quantification of intrathecally produced HIV-1-specific antibodies
T. Weber, A. Freter, W. Lüer, J. Haas, E. Stark, S. Poser and K. Felgenhauer (F.R.G.) 133

Antibodies in water immiscible solvents. Immobilized antibodies in hexane
H.H. Weetall (U.S.A.) 139

Letter to the editors

An ELISA for the detection of chimeric and human antibodies that contain κ light chains in nonhuman primate serum
D. Wunderlich and B. Zerler (U.S.A.) 143

Book review 147

Announcement 148

Notes to authors 149

Number 2 – 15 February 1991

Announcement from the publisher iii

Research reports

Purification of a murine monoclonal antibody of the IgM class
V.P. Knutson, R.A. Buck and R.M. Moreno (U.S.A.) 151

Detection of IgA binding site by flow cytometry with fluorescent microspheres
T. Shimada, H. Yoshida, H. Tokumoto, J. Yodoi and T. Sugiyama (Japan) 159

Efficient induction of Semliki Forest virus and mumps virus neutralizing anti-anti-idiotypic antibodies using Quil A as adjuvant
T.A.M. Oosterlaken, A. Brandenburg, P. Schielen, R. Fransen, C.A. Kraaijeveld and H. Snippe (The Netherlands) 169

High performance thin layer chromatography ELISAGRAM. Application of a multi-hapten immunoassay to analysis of the zearalenone and aflatoxin mycotoxin families
J.J. Pestka (U.S.A.) 177

The use of a hapten-Fab conjugate to sensitize target cells for antibody-dependent complement-mediated lysis and antibody-dependent cell-mediated cytotoxicity
A. Aase and T.E. Michaelsen (Norway) 185

Genomic determination of the CR1 (CD35) density polymorphism on erythrocytes using polymerase chain reaction amplification and *Hin*dIII restriction enzyme digestion
P. Cornillet, F. Philbert, M.D. Kazatchkine and J.H.M. Cohen (France) 193

Anti-peptide antibodies to cathepsins B, L and D and type IV collagenase. Specific recognition and inhibition of the enzymes
T.H.T. Coetzer, E. Elliott, P.H. Fortgens, R.N. Pike and C. Dennison (Republic of South Africa) 199

Recombinant fusion proteins of protein A and protein G with glutathione *S*-transferase as reporter molecules
A.M. Lew, D.J. Beck and L.M. Thomas (Australia) 211

Production of a pokeweed antiviral protein (PAP)-containing immunotoxin, B43-PAP, directed against the CD19 human B lineage lymphoid differentiation antigen in highly purified form for human clinical trials
D.E. Myers, J.D. Irvin, R.S. Smith, V.M. Kuebelbeck and F.M. Uckun (U.S.A.) 221

Enzyme-linked immunosorbent assay (ELISA) for HIV antibody by a glass slide technique
K.O. Smith, M.J. Ludwig, B.W. Stigall and N. Boswell (U.S.A.) 239

Two distinct monoclonal antibodies raised against mouse β nerve growth factor. Generation of bi-specific anti-nerve growth factor anti-horseradish peroxidase antibodies for use in a homogeneous enzyme immunoassay
R.L. Kenigsberg, P.J. Elliott and A.C. Cuello (Canada) 247

Simultaneous measurement of cell surface and intracellular antigens by multiple flow cytometry
H. Sumner, D. Abraham, G. Bou-Gharios, C. Plater-Zyberk and I. Olsen (U.K.) 259

Characterisation of monoclonal antibodies to human factor X/Xa. Initial observations with a quantitative ELISA procedure
R.B. Hoad and C.L. Geczy (Australia) 269

Optimization of binding capacity and specificity of protein G on various solid matrices for immunoglobulins
J.B. Pilcher, V.C.W. Tsang, W. Zhou, C.M. Black and C. Sidman (U.S.A.) 279

In vivo anti-complementary activities of the cobra venom factors from *Naja naja* and *Naja haje*
C.W. Van den Berg, P.C. Aerts and H. Van Dijk (The Netherlands) 287
